

WAVES AND STRUCTURES

Chapter 1: INTRODUCTION

1.1	Introduction	1
1.2	Generation	1
1.3	Decay	2
1.4	Classification	3
1.5	Measurement	4
1.6	Wave Forecasting	8
1.6.1	The Significant Wave	8
1.6.2	Simplified versus Elaborate Technique	10
1.6.3	Simplified Methods	10
1.6.4	Forecasting in Hurricanes	15
1.6.5	Numerical Wave Modeling	16

Chapter 2: WAVE THEORIES

2.1	Basic Hydrodynamic Equations	1
2.2	Wave Theories	3

Chapter 3: RANDOM WAVES

3.1	Wave Spectrum Analysis	1
3.2	Wave Statistics	9

Chapter 4: WAVE PROPAGATION

4.1	Wave Shoaling	1
4.2	Wave Refraction	1
4.3	Wave Diffraction	3
4.4.	Wave Reflection	4
4.5	Combined Effects using Numerical Solution	6
4.6	Effect of currents	8
4.7	Wave Breaking	8
4.8	Wave Set Up, Set down and Run Up	10
4.9	Appendix I: Stokes Fifth Order Theory Coefficients	32
4.10	Appendix II: Graphical Procedure to Draw Refraction Diagrams ...	33

Chapter 5: NUMERICAL MODELING OF WAVES

5.1	Introduction	1
5.2	Boundary Integral Models	2
5.3	Mild Slope Equation Models	2
5.4	Boussinesq Equation Models	3
5.5	Phase Averaging Models: (Spectral Models)	3

Chapter 6: DESIGN WATER DEPTH

6.1	Astronomical tides	1
6.2	Tsunamis	7
6.3	Pressure set-up: (Atmospheric or Barometric)	12
6.4	Wind set-up	12
6.5	Wave set-up	16

Chapter 7: WAVE FORCES ON SHORE-BASED STRUCTURES

7.1	Introduction	1
7.2	Forces on Vertical Faced Structures	1
7.3	Forces On Sloping Face Structures	15

Chapter 8: WAVE FORCE ON SMALL DIAMETER MEMBERS

8.1	The Morison's equation	1
8.2	Total Wave Force On The Entire Member Length	12
8.3	Wave Forces Using Stokes (V) Theory	17
8.4	Calculation Of Wave Forces Using Dean's Theory	18
8.5	Wave Force On Inclined Members	19
8.6	Wave Slam	24
8.7	Limitations of the Morrison's Equatio	25

Chapter 9: MAXIMUM WAVE FORCE ON THE ENTIRE STRUCTURE

9.1	Example.....	1
-----	--------------	---

Chapter 10: WAVE FORCES ON LARGE DIAMETER MEMBERS

10.1	Introduction	1
10.2	Froude-Krylov Theory	2
10.3	Diffraction Theory	14

Chapter 11: SPECTRAL AND STATISTICAL ANALYSIS OF WAVE FORCES

11.1	Spectral Analysis of Wave Forces	1
11.2	Statistical Analysis Of Wave Forces	6
11.3	Full Stochastic Analysis Of Waves	11

Chapter 12: WAVE RUN UP

12.1	Introduction	1
------	--------------------	---

12.2	Run Up	1
12.3	Wave Overtopping	6
12.4	Transmission of Waves	11

Chapter 13: PIPELINE HYDRODYNAMICS

13.1	Introduction	1
13.2	Hydrodynamic loading	1

Chapter 14: STATICS OF FLOATING BODIES

14.1	Introduction	1
14.2	Stability of a Floating Body	6
14.3	Large angle displacements	20
14.4	Vertical shifting of weight	21
14.5	Horizontal shifting of weight	22
14.6	Loss in GM due to partially flooded compartments	24
14.7	Flooded stability	25

Chapter 15: VIBRATIONS

15.1	Introduction	1
15.2	Free Vibrations With Damping	3
15.3	Forced Vibrations	7
15.4	Forced Damped Vibrations	9
15.5	Torsional Vibrations	11

Chapter 16: MOTIONS OF FREELY FLOATING BODIES

16.1	Encountering Wave Frequency	1
16.2	Ship Motions	3
16.3	Heaving motions	4
16.4	Pitching motion	12
16.5	Rolling Motions	

Chapter 17: MOTION RESPONSE OF COMPLIANT STRUCTURES

17.1	Freely floating buoy	1
17.2	Semi-submersible	3
17.3	Articulated tower	8
17.4	Tension Leg Platform	14
17.5	Mooring Buoys	17
17.6	The T L P	20
